B2B INTEGRATION GUIDE

Juspay Hyperswitch B2B Router

Slug: juspay/hyperswitch | License: Apache-2.0 | Category: PAYMENTS | Stars: 13.4k

HEALTH SCORE	DIFFICULTY	SAVINGS TELEMETRY
93/100	Alta	$3,100 USD / mes en comi

1. Repository Technical Description

Switch de pagos universal escrito en Rust. Orquestación inteligente de cobros y enrutamiento dinámico multi-adquirente con soporte PCI-DSS.

SYSTEM DEPENDENCIES:

Rust Runtime, PostgreSQL 14+, Redis Cluster

INTEGRATION TRIGGERS:

Payment Intent Confirmation Webhook, Dispute Chargeback Ingestion, Merchant Smart Routing Rule

2. STEP-BY-STEP FOR WINDOWS (PowerShell & WSL2)

Validate WSL2 Subsystem

```
wsl --status
wsl --update
docker version
```

Persistence & Session Variables

```
$env:DATA_PATH = "$HOME\oss-atlas-data\juspay_hyperswitch"
New-Item -ItemType Directory -Force -Path $env:DATA_PATH
```

Deploy Container in Windows

```
docker run -d --name hyperswitch -p 8080:8080 -v hyperswitch_config:/etc/hyperswitch
juspay/hyperswitch-router:latest --restart unless-stopped
```

3. STEP-BY-STEP FOR MACOS (Homebrew, Colima & Apple Silicon)

Colima Provisioning

```
brew install colima docker
colima start --cpu 4 --memory 4 --disk 40
```

Persistence & Zsh Variables

```
mkdir -p "$HOME/oss-atlas-data/juspay_hyperswitch"
export DATA_DIR="$HOME/oss-atlas-data/juspay_hyperswitch"
```

Multi-Arch Deployment

```
docker run -d --name hyperswitch -p 8080:8080 -v hyperswitch_config:/etc/hyperswitch
juspay/hyperswitch-router:latest --restart unless-stopped
```

4. Production Security Hardening Recommendations

1. Network Isolation: Deploy containers inside dedicated bridge networks (e.g., docker network create oss-net).
2. Credentials Management: Store passwords in environment files protected with chmod 600 permissions.
3. Secure Persistence: Configure volume mounts with daily snapshot backups to encrypted storage.
4. CVE Monitoring: Periodically review vulnerability advisories via OSS Atlas metrics.
