B2B INTEGRATION GUIDE

Meetily AI Meeting Assistant

Slug: meetily/meetily | License: MIT | Category: AI | Stars: 9.2k

HEALTH SCORE	DIFFICULTY	SAVINGS TELEMETRY
95.45/100	Baja	$14 USD / mes vs Granola

1. Repository Technical Description

Asistente de reuniones IA local y privado. Graba, transcribe con Whisper local y genera minutas ejecutivas estructuradas sin enviar audio a nubes externas.

SYSTEM DEPENDENCIES:

Node.js 20+ / Docker, Whisper.cpp / ffmpeg, CUDA opcional

INTEGRATION TRIGGERS:

Meeting Audio Stream, Whisper Transcription Hook, Markdown Minute Export

2. STEP-BY-STEP FOR WINDOWS (PowerShell & WSL2)

Validate WSL2 Subsystem

```
wsl --status
wsl --update
docker version
```

Persistence & Session Variables

```
$env:DATA_PATH = "$HOME\oss-atlas-data\meetily_meetily"
New-Item -ItemType Directory -Force -Path $env:DATA_PATH
```

Deploy Container in Windows

```
docker run -d --name meetily-core -p 3010:3000 -v meetily_vault:/app/vault meetily/meetily:latest --restart
unless-stopped
```

3. STEP-BY-STEP FOR MACOS (Homebrew, Colima & Apple Silicon)

Colima Provisioning

```
brew install colima docker
colima start --cpu 4 --memory 4 --disk 40
```

Persistence & Zsh Variables

```
mkdir -p "$HOME/oss-atlas-data/meetily_meetily"
export DATA_DIR="$HOME/oss-atlas-data/meetily_meetily"
```

Multi-Arch Deployment

```
docker run -d --name meetily-core -p 3010:3000 -v meetily_vault:/app/vault meetily/meetily:latest --restart unless-stopped
```

4. Production Security Hardening Recommendations

1. Network Isolation: Deploy containers inside dedicated bridge networks (e.g., docker network create oss-net).
2. Credentials Management: Store passwords in environment files protected with chmod 600 permissions.
3. Secure Persistence: Configure volume mounts with daily snapshot backups to encrypted storage.
4. CVE Monitoring: Periodically review vulnerability advisories via OSS Atlas metrics.
