B2B INTEGRATION GUIDE

Upscayl AI Image Super-Resolution

Slug: upscayl/upscayl | License: AGPL-3.0 | Category: AI | Stars: 32.5k

HEALTH SCORE	DIFFICULTY	SAVINGS TELEMETRY
96.95/100	Baja	$10 USD / mes vs Topaz G

1. Repository Technical Description

Escalador y mejorador de resolución de imágenes 4x/8x por IA mediante modelos Real-ESRGAN locales acelerados por GPU.

SYSTEM DEPENDENCIES:

Vulkan SDK / GPU Driver, Docker Engine

INTEGRATION TRIGGERS:

Batch Image Upscaling Task, Vulkan/CUDA Tensor Acceleration, Sharpening Filter Hook

2. STEP-BY-STEP FOR WINDOWS (PowerShell & WSL2)

Validate WSL2 Subsystem

```
wsl --status
wsl --update
docker version
```

Persistence & Session Variables

```
$env:DATA_PATH = "$HOME\oss-atlas-data\upscayl_upscayl"
New-Item -ItemType Directory -Force -Path $env:DATA_PATH
```

Deploy Container in Windows

```
docker run -d --name upscayl-core -p 8088:8080 -v upscayl_output:/data/output upscayl/upscayl-cli:latest
--restart unless-stopped
```

3. STEP-BY-STEP FOR MACOS (Homebrew, Colima & Apple Silicon)

Colima Provisioning

```
brew install colima docker
colima start --cpu 4 --memory 4 --disk 40
```

Persistence & Zsh Variables

```
mkdir -p "$HOME/oss-atlas-data/upscayl_upscayl"
export DATA_DIR="$HOME/oss-atlas-data/upscayl_upscayl"
```

Multi-Arch Deployment

```
docker run -d --name upscayl-core -p 8088:8080 -v upscayl_output:/data/output upscayl/upscayl-cli:latest
--restart unless-stopped
```

4. Production Security Hardening Recommendations

1. Network Isolation: Deploy containers inside dedicated bridge networks (e.g., docker network create oss-net).
2. Credentials Management: Store passwords in environment files protected with chmod 600 permissions.
3. Secure Persistence: Configure volume mounts with daily snapshot backups to encrypted storage.
4. CVE Monitoring: Periodically review vulnerability advisories via OSS Atlas metrics.
