# B2B INTEGRATION GUIDE

## Vane Conversational AI Search

Slug: vane-ai/vane | License: MIT | Category: AI | Stars: 6.1k

| HEALTH SCORE | DIFFICULTY | SAVINGS TELEMETRY |
| --- | --- | --- |
| 93.85/100 | Baja | $50 USD / mes vs Perplex |

### 1. Repository Technical Description

Buscador conversacional con citas académicas y extracción de fuentes en tiempo real para intranet empresarial sin trackers.

**SYSTEM DEPENDENCIES:**

Node.js / Docker, SearXNG / Web Search API

**INTEGRATION TRIGGERS:**

Web Crawler Query Dispatch, Source Citation Synthesizer, Reranking Evaluation

## 2. STEP-BY-STEP FOR WINDOWS (PowerShell & WSL2)

**Validate WSL2 Subsystem**

```
wsl --status
wsl --update
docker version
```

**Persistence & Session Variables**

```
$env:DATA_PATH = "$HOME\oss-atlas-data\vane-ai_vane"
New-Item -ItemType Directory -Force -Path $env:DATA_PATH
```

**Deploy Container in Windows**

```
docker run -d --name vane-search -p 3014:3000 -v vane_cache:/app/cache vane/vane:latest --restart
unless-stopped
```

## 3. STEP-BY-STEP FOR MACOS (Homebrew, Colima & Apple Silicon)

**Colima Provisioning**

```
brew install colima docker
colima start --cpu 4 --memory 4 --disk 40
```

**Persistence & Zsh Variables**

```
mkdir -p "$HOME/oss-atlas-data/vane-ai_vane"
export DATA_DIR="$HOME/oss-atlas-data/vane-ai_vane"
```

**Multi-Arch Deployment**

```
docker run -d --name vane-search -p 3014:3000 -v vane_cache:/app/cache vane/vane:latest --restart unless-stopped
```

## 4. Production Security Hardening Recommendations

1. Network Isolation: Deploy containers inside dedicated bridge networks (e.g., docker network create oss-net).
2. Credentials Management: Store passwords in environment files protected with chmod 600 permissions.
3. Secure Persistence: Configure volume mounts with daily snapshot backups to encrypted storage.
4. CVE Monitoring: Periodically review vulnerability advisories via OSS Atlas metrics.
